PROFILE

Business Analytics Master's student with a Bachelor's degree in **Information Technology** and software engineering background, skilled in Python, SQL and Power BI. Experienced in data cleaning, validation, integration and building reusable analyses that support business decisions. Interested in applying analytical and technical skills to solve business problems, improve processes and support data-driven decision-making across different industries.

EDUCATION

University of Oulu **2026 – Present**
Master's Degree in Business Analytics, Faculty of ITEE *Oulu, Finland*

Sri Venkatesvara College of Engineering **2020 – 2024**
Bachelor of Technology in Information Technology *Chennai, India*

PROJECTS

Customer 360 – Data Quality & Identity Resolution | *Python, Pandas, SQL, Power BI, DAX, Excel*

- Integrated synthetic booking, loyalty and digital interaction data to build unified customer profiles.
- Performed data cleaning, validation, deduplication and graph-based identity resolution using Python and Pandas.
- Developed SQL queries using CTEs, joins and window functions to measure data quality and record-matching KPIs.
- Achieved 99.8% matching precision and recall on records with usable identifiers and identified agency booking data gaps.
- Created a data quality scorecard, business glossary and Power BI star-schema model with DAX measures.

Oulu Snow Delay Analysis | *Python, Pandas, Power BI, DAX*

- Analysed 1,500+ days of FMI weather data to investigate delayed snowfall in Oulu in autumn 2025 and 2026.
- Cleaned and merged data from three weather stations using Python and Pandas, handling missing values, FMI data codes and station-level data gaps.
- Built an interactive Power BI dashboard with custom DAX measures to track first and permanent snow dates, frost days and autumn temperatures.
- Compared autumn temperatures, frost days and the share of precipitation falling as rain or snow across years to assess how the delayed snowfall differed from earlier autumns.

Electricity Price Feasibility Analysis – Household Consumption | *Power BI, Power Query, DAX, Excel*

- Combined ENTSO-E hourly electricity prices with Fingrid household consumption data to assess a price-based energy opportunity.
- Cleaned and transformed datasets, converted 15-minute prices to hourly averages and handled UTC-to-Finnish time conversion.
- Built a Power BI data model with DAX measures for average and consumption-weighted prices.
- Developed interactive visuals with hourly, monthly and weekday/weekend filters to analyse price and consumption patterns.

PROFESSIONAL EXPERIENCE

Newage Software and Solutions **Aug 2025 – Jun 2026**
Software Engineer *India*

- Developed and maintained enterprise Finance, Freight Forwarding and Transportation Management applications.
- Worked with Angular, TypeScript, Java, Spring Boot and REST APIs.
- Used SQL and relational databases to support business application functionality and data operations.
- Supported billing, invoicing and reconciliation processes, ensuring accurate business calculations.
- Investigated application issues and collaborated with cross-functional teams using Agile/Scrum, Git and GitHub.

Pickyourtrail **Jun 2024 – Nov 2024**
Associate – Customer Experience *India*

- Handled customer queries, onboarding and travel briefing calls throughout the customer journey.
- Audited sales processes and travel itineraries for accuracy and alignment with customer requirements.

Armoured Vehicles Nigam Limited **Jul 2023 – Aug 2023**
Data Analyst Intern *India*

- Extracted and analysed inventory data using SQL joins, subqueries, GROUP BY and aggregate functions.
- Performed data cleaning and validation to identify duplicates, missing values and inconsistencies.
- Used Excel pivot tables, lookup functions and filters to analyse inventory trends and prepare reports.

TECHNICAL SKILLS

Data Analysis: Data cleaning, validation, deduplication, identity resolution, EDA, KPI development

Programming: Python (Pandas, NumPy), SQL, Excel, Power Query

Databases: MySQL, CTEs, joins, subqueries, aggregation

BI & Reporting: Power BI, DAX, star schema, dashboards, KPI reporting

Development: Angular, TypeScript, Java, Spring Boot, REST APIs, Git/GitHub

AI Tools: ChatGPT, Claude, GitHub Copilot, Cursor

CERTIFICATIONS

Microsoft Power BI: Self-paced training (Microsoft Learn) | Google Analytics | Basic Relational Database Design | Basics of Python
